

Worldwide Government Transactions Increasing

The Multi Service Marine government bunker procurement system for all non-U.S. military organizations recorded its first transactions in 2009 and expects exponential growth in 2010.

The German Navy and UK Ministry of Defense both completed training of the online system in 2009. The first fuel inquiries from the German Navy were placed in Europe and Africa. The UK Ministry of Defense will begin placing inquiries in Q1 2010. Additionally, an Asia-Pacific government organization has been utilizing the Multi Service Marine program to acquire fuel, lubricants and ship services since Q3 2009.

If the success of the DESC SEA Card[®] Program provides an insight into the potential of additional government programs, Multi Service is expecting to see significant transaction growth in 2010. If you are not yet signed up to receive government inquiries, now is clearly a great time to join the program.
